VETEDY, GLOBAL REACH

Since more than 20 years, Vetedy Group has specialized in the production and distribution of exotic timbers for outdoor decking, cladding/ceiling and indoor flooring. Our 3 factories located in Cameroon, Indonesia and Belgium allow us to ensure fast distribution and a perfect control on the quality.

Counting a network of approximately 150 contractual distributors in more than 100 countries, Vetedy Group is one of the world's leading provider in decking and cladding solutions.

Our international offices from Luxembourg (HQ) passing by Dubai till Indonesia give us a perfect covering to instantly reply to our clients needs and technically support them in their own time zone.

Softline® DECKING

Softline® Ipe - Turkey

Softline® Padouk - Italia

Softline® Jaya - Indonesia

Softline® Ipe - Luxembourg

THE *Softline*® CLIP

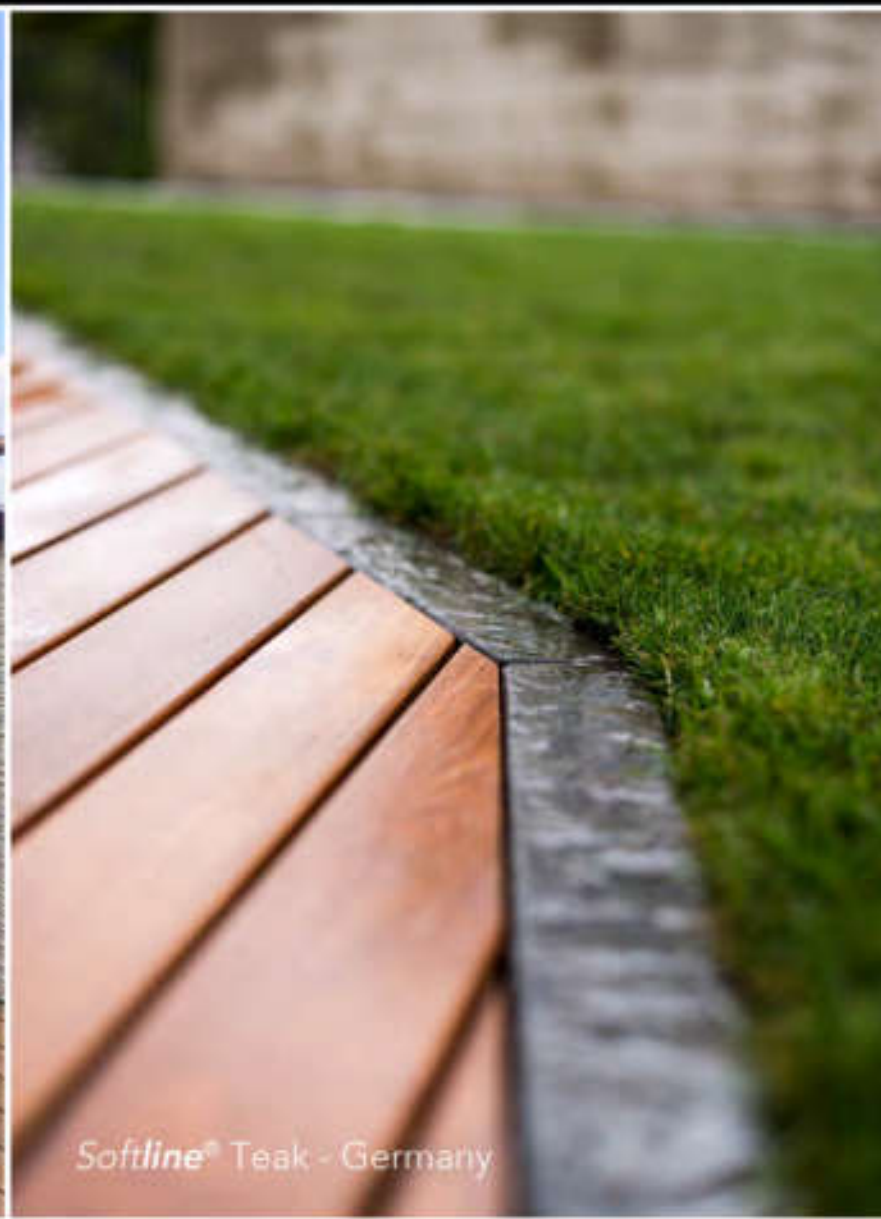

The *Softline*® is a 100%-invisible fastening system for decking. It is patented and manufactured near the Luxembourg border by Vetedy Group.

The clip is made of composite material with high mechanical strength and quality but still remains flexible to allow the wood to move freely. The clip allows an automatic and regular gap, a good ventilation of the wood as there is no direct contact between the board and the understructure, and horizontal & vertical frame 100%-invisibly fixed. The system also includes a tongue&groove system for a perfect junction and is fitted with approved wooden species for an extreme durability on the deck.

Softline® Ipe - Taiwan

Techniclic® CLADDING

Techniclic® Padouk - Belgium

Techniclic® Jaya - Belgium

Techniclic® Padouk - Belgium

Techniclic® Padouk - Belgium

THE *Techniclic*®

The *Techniclic*® system has been developed based on the *Softline*® clip. Produced in the same material, it differentiates itself by the fact that the clip has to be inserted in a basis profil instead of directly screwed on the understructure. The *Techniclic*® installation can be done outdoor or indoor for walls and ceilings! The boards are available in 3 widths with 4 types of spaces. It will give you many possibilities to create your own personalised design with a perfect aesthetic.

This simple concept will save you a significant amount of installation time over traditional systems and increase drastically the durability of the cladding.
